

SAMAR ISLAND NATURAL PARK

Management Manual

June 2006 – May 2016

The development of this management manual of the Samar island Natural Park was made possible through the Samar Island Biodiversity Project of the Department of Environment and Natural Resources with funding support from the Global Environment Facility-United Nations Development Programme. Errol A. Gatumbato, former Protected Area Superintendent (1995-2002) of the Mount Kanla-on Natural Park in Negros Island and currently working as an independent professional on conservation and protected areas design, planning and management served as the consultant for the development of this manual, which also contains the General Management Plan of SINP. June 2006.
